# Evacuation Ready Bags

***Evacuation Ready Bags are one of the essential things you need especially when you're living near a volcano.***

Here are the important items you will be needing inside an Evacuation Ready Bag:

- Water to rehydrate.
- Personal Hygiene and Basic Health Kit to apply to a minor injury such as scratches.
- Facemasks to prevent you from inhaling ashes.
- In case you have a severe injury during a hazard, the EMR is assigned to deliver you to a designated professional to treat your injury.
