What to do when an eruption is imminent?

- Leave the area immediately.
- If you are warned to evacuate because an eruption is imminent, evacuate.
- Avoid areas downwind and river valleys downstream of the volcano.

- Rubble and ash will be carried by wind and gravity.
- Close and lock all windows and outside doors.
- Take temporary shelter from the volcanic ash in the location where you are, if you have enough supplies.

- Turn off all heating and airconditioning systems and fans.
- Close the fireplace damper.
- Organize your emergency supplies and make sure household members know where the supplies are placed.
